

Information needed for the C Collection license key

Please send results from the database tier only:

Determine the Database Name	<pre>SELECT name FROM v\$database</pre>
Determine the Global Database Name	<pre>SELECT * FROM global_name</pre>
Determine the Host_Name (Database tier only) and Instance_Name	<pre>SELECT host_name, instance_name FROM v\$instance SELECT utl_inaddr.get_host_name FROM dual</pre>
Determine the IP Address	<pre>SELECT utl_inaddr.get_host_address FROM dual</pre>
Determine the Distinct Machine	<pre>SELECT distinct machine FROM v\$session WHERE program LIKE '%(SMON)%'</pre>

Please be absolutely certain when submitting key information, once the license key has been cut for a given instance it cannot be recreated for a different environment without the purchase of an additional license.
